Mayor
of the Klaipeda district
self-government
Bronius Markauskas

Dear Mr. Markauskas!

We would like to take this opportunity to express our respect and sincere gratitude for your support of our community, the assistance you have provided in the past, and your willingness to help meet the urgent needs of our community residents. Given the difficult situation in our community, the Lyman City Military Administration is asking for your help in providing the necessary equipment to carry out urgent tasks.

Today, the population of our community is 6,476 people. Most of the residents were forced to leave their homes due to constant shelling, but those who remain need protection and basic necessities.

Over the past few months, our community has been subjected to more than 5,000 shellings using multiple launch rocket systems and guided missiles. The shelling has caused significant damage to residential buildings, infrastructure, utilities, etc., and has led to fires. In such conditions, the personnel of the city's utilities perform a wide range of tasks on a daily basis, such as extinguishing fires, rescuing people, assisting in the elimination of the consequences of accidents, dangerous events, and emergencies, clearing debris from residential buildings destroyed by artillery and rocket attacks, social and critical infrastructure facilities, maintaining the technical condition of surviving apartment buildings and adjacent territories, and cleaning up unauthorized landfills. That is why the most pressing issue today is the readiness to respond quickly to events and emergencies of various kinds.

The provision of specialized equipment, vehicles, and personal protective equipment to the structural units of municipal enterprises and institutions is extremely important for the prompt and safer implementation of the above measures, given the active hostilities in the Donetsk region.

On July 7, 2025, after another shelling of the territory and a fire in the building where the property of the community's utility companies was located, the companies' equipment, materials, tools, and vehicles were damaged or destroyed. In this regard, we ask you to consider and approve a positive decision to provide assistance free of charge in the form of:

- For the municipal enterprise "Lymanska Single Customer Service" :

Dump truck — transportation of construction materials, equipment, and tools necessary for repair work on critically important infrastructure facilities and building structures of multi-story residential buildings damaged by shelling.

Mini loader compact excavator — for clearing minor debris from destruction, roads, life support facilities, etc.

Electric shears (2 pcs.) for branches, battery operated. For trimming trees, bushes, and undergrowth without unnecessary effort and with less strain on the hands, speeding up the work.

Inverter welding machine (2 pcs.) — for welding and repairing metal structures (pipes, frames, gates, carcasses, etc.).

Sewer cleaning machine (2 pcs., mechanical (gasoline engine) and electromechanical).

Battery-powered mini chainsaw (2 pcs.) — for cutting small pieces of wood for heating, small construction work (cutting boards, beams), etc.

Cordless pole pruner (1 unit) — for trimming branches, removing dry or damaged branches in hard-to-reach places.

- For the Liman Center for Public Safety:

Fire truck - for firefighting and emergency response.

Water tanker - for the rapid delivery of water to residents of remote and affected settlements, to provide water to social infrastructure institutions (schools, medical centers, shelters, etc.), to promote fire safety in the absence of a hydrant network, and to maintain sanitary and hygienic conditions in the community.

The requested equipment will be used to eliminate the consequences of shelling, including clearing debris and repairing damaged buildings, restoring electricity and water supply networks, performing emergency rescue operations, and transporting materials, tools, and equipment.

We are deeply aware of the importance of maintaining the operability and integrity of the equipment received and will take the utmost care to ensure its proper use.

We thank you in advance for considering our request and hope for your support during this difficult time. Your help will be invaluable in restoring the functioning of our community.
