Bronius Markauskas

Dear Mr. Markauskas!

Lyman City Military Administration of Kramatorsk District, Donetsk Region, expresses its sincere gratitude to Klaipėda District Municipality for its long-standing support of the Lyman City Territorial Community, its attention to the needs of our residents, and its continued willingness to assist our community during the full-scale war.

Due to the ongoing hostilities and the destruction of residential buildings and infrastructure, one of the most important areas of work of the Lyman City Military Administration remains supporting residents whose property has been damaged or destroyed as a result of the armed aggression of the Russian Federation. For this purpose, the relevant commissions have been established. The Commission for Consideration of Compensation for Destroyed Real Estate, which processes residents' applications and adopts decisions on compensation, including compensation in the form of housing certificates, consists of **19 members**.

A separate Commission for Remote Inspection of Destroyed Real Estate is also operating and consists of **16 members**. Its work is particularly important because, due to active hostilities and the difficult security situation, direct access to a significant number of settlements within the Lyman community is impossible or severely restricted. Remote inspections make it possible to officially confirm the destruction of properties and subsequently enable residents to exercise their right to compensation.

The work of these commissions involves the continuous processing of large volumes of electronic documents, photo and video materials, data from state registers, the holding of online meetings, and the preparation of decisions, inspection reports, minutes and other documents.

In addition, employees of the executive bodies of the Lyman City Council conduct outreach receptions for residents of the community who, because of the war, have been forced to live in different regions of Ukraine, and they also support the operation of mobile workplaces and consultation points.

In this connection, the community has a need for humanitarian assistance in the form of modern computer and communication equipment, including:

- **laptops** suitable for working with state electronic systems and registers, electronic document management, online meetings and mobile workplaces;
- **portable power stations** to ensure autonomous operation of equipment during power outages, at temporary locations and during outreach receptions;
- **mobile Wi-Fi routers** to provide Internet access when working outside permanent office locations;
- **high-capacity power banks** to ensure the uninterrupted operation of mobile phones

and other devices.

The need for autonomous power supply is especially important, as dedicated telephone lines operate continuously both within and outside the community, enabling residents to receive consultations and necessary information, including on compensation for destroyed real estate, support for internally displaced persons, veterans' policy, and other matters falling within the competence of the Lyman City Military Administration and its executive bodies.

There is also an urgent need for a **passenger minibus** to ensure the mobility of staff, organize outreach receptions for residents, transport commission members and employees, and carry the necessary equipment.

Such a vehicle would make it possible to organize the work of the Lyman community's mobile office, conduct outreach receptions in places where displaced residents are concentrated, ensure the participation of employees and commission members in working activities, and transport the necessary equipment promptly.

In view of the above, we kindly ask Klaipėda District Municipality to consider the possibility of providing humanitarian assistance to the Lyman City Territorial Community in the form of **computer and communication equipment, autonomous power supply equipment, as well as a passenger minibus**.

The quantity of equipment may be determined taking into account the capacities of Klaipėda District Municipality and the partners involved in providing assistance.

For our community, such support would make an important contribution to ensuring uninterrupted work with residents who have lost their homes because of the war and would help make administrative and consultation services more accessible to people who are currently living far from their home community.

We sincerely thank Klaipėda District Municipality for its friendship, solidarity and continued support of the Lyman community.

Yours sincerely
Head of the Lyman city military administration

Oleksandr Zhuravlov
